

## COFFEE TABLE 965

**JOSEF FRANK HAPPILY BLENDED** different types of materials to create exciting furniture. Table 965, in granite or travertine board, was designed by Josef Frank in 1938. The tapered legs are finished off with a stylized foot which is typical of his design, and it was inspired by historical English furniture tradition.

**DESIGN:** Josef Frank / **HEIGHT:** 48 cm / **DIAMETER:** 90 cm

# COFFEE TABLE 965

**MATERIAL** Mahogany with a black granite board: *Granite* is a compact and hard stone, which is suitable for tabletops. The stone is polished and has a glossy finish. Mahogany with travertine board: *Travertine* is a beige porous and honeycombed marble from quarries in southern Europe. The stone cavities are filled with stone mass and then ground smooth, which gives each stone an individual appearance. The Travertine is cut to give a satin finish.

**CARE INSTRUCTIONS** Svenskt Tenn's furniture is made from wood and then lacquered. The woodwork should be cleaned simply with a soft cloth dampened with mild dish detergent or soapy water. Make sure to dry it with a soft cloth.

Polish, oil or abrasive cleaners should never be used on the furniture. Never expose the furniture to prolonged humidity or direct heat. If an injury in the paint or wood occurs, you should immediately contact a furniture restorer. Often you can restore easier damage, but the damage is likely to worsen if not taken care of. Never move the furniture by dragging it across the floor.

The furniture lacquer can be damaged by direct heat and lengthy exposure to dampness.

When cleaning stone such as granite or travertine, use a soft cloth dampened with water and green soap. Dry with a soft cloth.

Remember that acids such as red wine and lemon can stain the stone. This applies to both polished and matt granite and marble. If acid is spilled, be sure to wipe the surface directly.
